

Course Prerequisites: Advanced Resuscitation

Your preparation prior to attending an Advanced Resuscitation practical program involves some web based pre-reading followed by an online competency ("Web Quiz") to demonstrate your understanding of the major principles of Advanced Resuscitation interventions.

You will need approximately **three to four hours** to undertake your pre-reading and a further **30 minutes** to undertake your online Advanced Resuscitation Web Quiz.

Compulsory pre-reading (online)

You will need to have reviewed the following sections of the NeoResus web site. You may wish to "tick" the boxes provided once you have completed each section.

Learning modules:

- Module 1: Key concepts and guidelines
- Module 4: Post resuscitation care

Presentations:

- Operating and troubleshooting a T-piece device (Neopuff™ Infant Resuscitator)
- Operating and troubleshooting a self inflating bag
- Pedi-Cap™ CO₂ detector

Optional viewing (online)

You may wish to review the PDF "First Response & Overview of Advanced Resuscitation" (in presentations), however this will be presented and discussed by the NeoResus Facilitator on the day of your program.

Online competency assessment (Advanced Resuscitation Web Quiz)

- Advanced Resuscitation Pre-Test (Web Quiz)

On the day of your training program you will need to bring the following items with you:

- Your ID badge or lanyard
- A pen
